

NEW! EVEREST CHALLENGER TEAMBUILDING SOLUTION

Just before 830am on May 25th, 1998, a climber from Singapore's 1st Singapore Mt Everest Expedition reached the top of the world. Edwin Siew made history in climbing to the top of the 8850-metre peak. 10 years later, Everest expedition leader David Lim announces **the launch of Everest Challenger, the world's first teambuilding simulation game based on teams climbing Mt Everest.**

Now, everyone can 'climb' their Everest!

Aimed at helping organisations improve their teambuilding solutions, Everest Challenger has been two years in the making, and is a careful mix of authenticity and 'playability' – injecting learning outcomes, and rewarding great teamwork and cooperation

Everest Motivation Team Pte Ltd has invested thousands of dollars in developing this world-first game that will soon be rolled out to corporations, trainers, consultants, facilitators and teambuilding experts worldwide as a unique 'toolbox' in aiding organisational learning.

Game play includes teams of 6 -8 per table organising themselves with limited resources, and facing the various team and leadership challenges required to succeed. Teams learn through debriefing sessions:

- project management
- productive team behaviours
- leadership skills
- how to build trust

For: Teams 6 – 100. Ideal for corporate retreats, teambuilding, team learning workshops

Growing Teams, Building Leaders
