

EVEREST CHALLENGER™ TEAMBUILDING

10 years after the landmark 1st Singapore Everest Expedition in 1998, Everest expedition leader David Lim launches **Everest Challenger, the world's first table-top teambuilding simulation game based on teams climbing Mt Everest. Now, everyone can 'climb' their Everest!**

Aimed at helping organisations improve their teambuilding solutions, **Everest Challenger™** has been two years in the making.

It is a careful mix of authenticity and 'playability' – injecting learning outcomes, and rewarding great teamwork and cooperation

Everest Motivation Team Pte Ltd has developed this world-first game that has been used to help teamwork in organisations worldwide, and used by organisations such as UBS, and Wella

The simulation is also a unique 'toolbox' for human resource officers, consultants, and workshop leaders

Game play: Teams of 5-8 people per table, organising themselves with limited resources, and facing the various team and leadership challenges required to succeed on Mt Everest

Format: Half-day programme which can be combined with any internal meeting agenda, or corporate retreat / teambuilding workshop.

Teams learn through debriefing sessions after the conclusion of the simulation. Great for:

- project management skills
- productive team behaviours
- leadership skills
- learning to build trust
- reinforcing collaboration

For: Teams 6 – 60. Ideal for corporate retreats, teambuilding, team learning workshops. **Everest Challenger™** is a solution deliverable by **Everest Motivation Team** or its subsidiary, **Everest Teambuilding**. Contact us for more details:
