

David's Gear Sale 2012!

Item	Description and Asking Price
<u>Marmot Gore-Tex Paclite Jacket</u> 	Lightweight Paclite jacket by Marmot- still in good condition with slight wear and tear(no holes!)- two side pockets and one internal chest pocket, Hood to fit helmet, storm cuffs, elastic cord for hemline. Packs down to 400grams Medium size – fit chest size up to 40-42 Retailed at USD\$250 <u>Now selling at SGD\$150</u>
Mens Gaspesie Pants with Teijin Eco=Storm fabric (more breathable than Gore tex) NEW! 	Fits waist up to 33". About USD\$90 retail <u>Selling SG\$100</u> Weight: 380g (Medium) With a contemporary cut that slides over midweight layers or even technical base layers, these pants are made for outdoor generalists. The polyester face fabric features a simple basket weave that is very abrasion-resistant. Its inherent water repellency is amped up with an excellent DWR (durable water repellency) treatment; the result is great water shedding capacity. • Fully taped waterproof-breathable construction. • Teijin Eco Storm™ recycled polyester 2-layer laminate. • Face fabric and interior lining is recycled, heavy metal-free polyester. • Gusseted crotch for mobility. • Internal integral waistbelt with side-release buckle. • Coated nylon kick patches protect high-wear areas. • Calf-high ankle zips with snap closures.

Alpine Designs Mittens

NEW!

Asking SG\$85

With Thinsulate palms (wont lose warmth when compressed) and down filled back, these are the ultimate expedition mittens to keep your fingers warm high on Everest or K2

Activent Gore-Tex jacket – used once

Weighs in at 250grams and packs down to the size of a large beer can. This was Gore's idea of a windproof jacket for runners and outdoor sports people where weight, breathability and packability was more important than waterproofness.

Asking: SGD\$55

Marmot Precip Pants (mens Medium)

Marmot's proprietary PU-based breathable fabric (about half of that of Gore-Tex). Some wear and tear, especially in the waterproofness area in the crotch area.

Still good for wind resistance. Very lightweight

Asking SG \$25

Retails at USD\$80

REI UL (ultralight) 45 litre day pack

New at USD\$75

Used at SGD\$30

REI's lightest weight extended weekend pack features a minimalist design to help you travel lighter with greater comfort! ActivMotion™ suspension keeps load balanced as you move; adjustable yoke, linked shoulder straps and hipbelt improves stability and comfort Shoulder straps link behind the hipbelt, so load stays balanced even when you extend your arm overhead Ultralight backpanel frame system is designed to carry the load with a minimum of parts and very little weight Backpanel slides easily on pack's single center frame aluminum stay to fit torsos of varying lengths; mesh-covered to allow ventilation Hipbelt angle can be adjusted on both sides

to deliver the best fit; hipbelt sports two mesh pockets (one zippered) for easy access Internal compression system pulls the load in with one tug, eliminating external straps and buckles; collar cinch-cord further stabilizes contents Fully cinched internal compression cord and collar cinch cord turns front pocket into a daypack-size compartment for day trips and peak bagging Inner sleeve holds your hydration reservoir (sold separately); dual ports allow tube to route over either shoulder Zippered top pocket and large mesh side pockets let you stash items for quick access Comes with simple, lightweight tool attachments and water-resistant external zippers Revolutionary lightweight nylon is infused with silicone for strength and water-resistance; tough double-ripstop nylon is used in high-wear areas Recommended load weight is a maximum of 36 to 40 lbs. Engineered for ultralight packing,
